

Personal Immediate Decontamination Kit

The **Personal Immediate Decontamination (PID) Kit** provides an economical, quick-use decontamination kit. The PID combines the best of class decontamination technology to meet the immediate need of one individual.

The PID Kit included:

- **DCON Mitt** — an all-hazard microfiber mitt with a proprietary ChemBarrier lining for additional risk mitigation. The DCON Mitt is perfect for bulk removal of liquid and powder contaminants.
- **CBR Multi-Purpose Wipe Kit** — is currently fielded by the US Department of Defense for immediate operational Chemical-Biological-Radiological decontamination of equipment
- **SSDX-12 Wet Wipe**—is a pre-wetted wipes saturated with a proprietary super soap that is safe for use on skin. Testing demonstrated SSDX-12 is more capable of removing VX and HD from synthetic skin (Merck Strat-M®) - removing 98%.
- **ChemBarrier Bag**—is a clear bag to secure and transport contaminated sensitive equipment and personal property (computers, cell phones, wallets, jewelry, etc.) until thorough decontamination can be completed without cross-contamination issues.
- **ChemBarrier Plus Bags**— is a reinforced bag for disposal of contaminated waste without requiring double bagging.
